Furthermore you encourage participation easily. I was pleased to see my silent colleagues speaking their minds. This was by far the best Training Course I have attended. It was the best communication workshop that I have ever attended in my life. My understanding of communication concepts improved a lot, and how to apply them - it was so well, put across.

Thank you for the enjoyable two days of learning and growing..... :)

Hi Leslie

I believe this is the best training course that I attended in Dell so far. The course contents are relatively easy to understand BUT you make the subject more lively and interesting, which makes me to grasp the knowledge into my mind quite simple. Thanks and Regards

Dear Leslie,

Thanks so much for your training. It's been a great session for us – to hear leadership guidance from a non-dell leader ☐. Does put a lot of things into perspective!

Do let me know what are your specific areas of specialization in training – so we may leverage your expertise further.

Also for me to recommend you to other leaders in the industry.

Leslie

You have magic powers ☐ I have been wanting to write and thank you for igniting a different spark within us as I felt a somewhat different feeling of camaraderie after our last session (at least, it was so for me). ☐ I also wanted to write to say that today I had a difficult discussion, therefore decided to use for the 1st time our 1x1 template– which is just genius!). The simplicity of the 1x1 template allowed me to be focused on my purpose. Even though I didn't get the desired outcome, I got what I listed as the 3rd likely response which I was prepared to accept. It was AWESOME. ☐ So thank you for that too.

Just like to tell you that I have enjoyed your training very much. Your lessons and teaching style is very engaging and interactive with all those audio and visual aids. As a trainer myself (no doubt in a different field) I have learned a lot from the way you teach and present yourself especially your eye contact, body language, intonation and gestures.

The way that you conduct the lessons, who needs the notes !

The way that you have conducted lessons have engaged all our senses regardless we are in the kinesthetic, auditory or visual group.

Last but not least, I have learned also to be a better trainer, speaker and presenter.

A dynamic, exciting presentation, where Leslie's brain colour explanation really helped us appreciate differences amongst staff members. He makes learning fun and took us through hands-on exercises to help reinforce those principles. We laughed, shouted and at the end of his presentations, walked out a better team

The Vision Alignment program conducted by Leslie Choudhury was amazing. We could see positive behaviour change from our core team members by even just the 2nd week, which in turn affected the rest of the company. This training has made our people more cohesive and approach challenges with a positive attitude. I am proud of my staff and despite of the time commitment and expenses I feel and know it was a well justified decision. I highly recommend this program for any organisation who wants to bring out the very best performance from their people and create a productive environment which is aligned to corporate vision.
